

| | |
|-----------------------------------|---|
| <i>Test-case identifier</i> | DeleteExpired |
| <i>Test Location</i> | CineECuNoi\ISSApp\TesteUnit\TèsteFunciõnale>DeleteExpiredTest.cs |
| <i>Feature to be tested</i> | Automatic removal of expired blood products |
| <i>Feature Pass/Fail Criteria</i> | The test passes if the database doesn't contain any expired product after 1 minute of waiting. |
| <i>Means of Control</i> | 1. The TestProdusExpirat() method is called automatically when the tests are executed. |
| <i>Data</i> | 2. The data about the blood products is read from the database, hosted at den1.mssql3.gear.host. |
| <i>Test Procedure</i> | The test is started by right-clicking the test case, and then clicking run, from the <i>Test Explorer Tab</i> . |
| <i>Special Requirements</i> | .NET Core library is needed for the test execution.. |
